Available for Remote | Freelance | Contract Tech Roles

PROFESSIONAL SUMMARY

Tech-focused freelancer with expertise in Python development, frontend web design, and AI tools integration. Experienced in building responsive websites from scratch, auditing and refactoring existing codebases, and automating digital tasks for individuals and small businesses. Strong ability to combine AI tools, modern web technologies, and design principles to create functional and visually appealing digital products. Reliable in remote environments with a proven track record of managing technical projects independently—from initial concept to final debugging and deployment.

TECHNICAL SKILLS

- **Development:** Python (Automation, Basics), HTML5, CSS3, JavaScript, Git & GitHub, Code Refactoring, Debugging
- **AI & Automation:** Machine Learning Fundamentals, AI Tools Integration, Prompt Engineering, Workflow Automation
- **Web & Design:** Responsive Web Design, UI/UX Principles, Figma, Canva, Branding & Digital Print Production
- **IT & Systems:** Windows & macOS Support, PCB Diagnostics, Hardware Troubleshooting, Cybersecurity Basics
- **Remote Tools:** VS Code, Google Workspace, Slack, Asana, ChatGPT (AI-assisted development)

PROFESSIONAL EXPERIENCE

Freelance AI Developer / Web Designer / IT Support Specialist

Remote | 2020 – Present

- Designed and developed modern, responsive websites and landing pages for small businesses and personal brands.
- Reviewed, edited, and refactored existing client codebases (HTML, CSS, JavaScript, Python) to fix bugs, optimize performance, and deploy new features.
- Created brand identity systems and digital print layouts for product packaging and marketing campaigns in the retail industry.
- Maintained and updated legacy websites, resolving technical errors to meet modern responsive design standards and improve user experience.
- Applied AI tools to improve content creation, workflow efficiency, and digital task automation.
- Provided remote and localized IT support, executing complex system troubleshooting and software configuration across Windows and macOS environments.
- Built simple automation workflows and digital productivity systems for clients using AI-assisted tools.

SELECTED PROJECTS

- **Code Auditing & Web Optimization:** Performed deep-dive debugging on existing client websites, editing legacy code to resolve layout breaks, fix scripts, and improve load speeds.
- **Brand Identity & Packaging Design:** Developed complete branding packages and digital print layouts for emerging retail products (including Nami Scents), ensuring high-quality visual outputs.
- **Hardware Diagnostics & Restoration:** Conducted advanced technical troubleshooting, including diagnosing component-level issues on PCB boards (such as restoring Hitachi boards damaged by 15V power surges) and managing system compatibility.
- **Digital Workflow Automation:** Built custom client tracking systems and applied AI tools for content generation, significantly optimizing business workflows.

VOLUNTEER EXPERIENCE

Programming Instructor – SAP Africa Code Week

- Taught beginners basic programming logic using the Scratch platform.

Technical Coordinator – Abuja The Musical (Krump Studio)

- Supported live event technical setup, stage management, and coordination.

EDUCATION

- **B.Sc. Physics** – National Open University, Abuja
- **National Diploma – Building Technology** – Federal Polytechnic Ado Ekiti

CAREER FOCUS

Seeking opportunities in:

- Remote Software Development & Code Maintenance (Frontend / Python)
- AI Tools & Automation Assistant Roles
- Freelance Web & UI/UX Design
- Remote IT Support & Tech Diagnostics
